PROJECTS

TECHSAGE

Built a web-based quiz app in Java with user authentication, quiz management, and score tracking. Integrated MySQL for data storage and enabled bulk question uploads via CSV.

WeFit

Created a web-based gym management system using HTML, CSS, and JavaScript for user registration, workout plans, and membership management.

Feasto

Built a GUI-based food ordering system using Python, Tkinter, and MongoDB with features like menu selection, order summary, and bill generation.

Genfolio

Built a MERN-based portfolio generator where users input data, pick templates, and customize styles. Features include login, history access, and easy personalization.
